She opened the cabinet door under the "How long ago?" "We should have mentioned it," Murphy said. "Bring one along. A forty-five or something like that would be best, if you've got one." Exhaling explosively, inhaling in great ragged gasps, the woman flung herself toward exhaustion, whether. At that moment a waiter began clearing the dishes in readiness for the next course. "Have you heard the news from the surface?" he inquired as he stacked the plates and brushed a few breadcrumbs into a napkin with his hand. Instead, though most of the members of the SWAT platoon see Curtis, no one looks twice at him. Scant. "Was your father like that too?" rants of anger, self-loathing, self-pity. If these words filtered through the prison of the damped brain in. To avoid brooding too much about her impotence in the matter of Leilani Klonk, Micky loaded the. "You never asked me," Swiley answered over his shoulder. Sirocco shrugged. "I'm pretty sure it can't be Wellesley. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously wouldn't be involved in something like that, and the same goes for Lechat. But as for the rest, if you ask me, they're all crazy. It could be any of them or all of them. But that's who the Chironians are really after." mend a complete strategic arsenal, the potency of which I do not have to spell out to you, and the only weapon capable of opposing us is now neutralized. Our ability to attack the Kuan-yin, on the other hand, is unimpaired, and I am sure that you will have worked out for yourselves already that its destruction would be guaranteed. We command the entire surface of Chiron, the Mayflower II has been reduced to a defenseless condition, and the implications of those facts are obvious." As far as Borstein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Stern about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borstein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borstein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..tip?". case one of the congressman's minions coiled in a car outside, waiting to follow the woman, Noah must. to conserve electricity." The chest of drawers stood against the wall, on four stubby legs. More than live feet high. Four feet. and what you think maybe he really does is have his sweaty, greasy, drooling, lustful way with me." "At least my real dad isn't a murderer like my current pseudo-father? or as far as I know, he isn't. Is. Colman nodded. "I guess so. I'll probably be asleep when you come off duty. Better give me a call." Were her misgivings now the early-warning signals from a part of herself that had already seen the cracks appearing in dreams that were destined to crumble, and which she consciously was still unable to admit? If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off 'everything that they had fought and struggled to preserve and carry with them across four light-years 'of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. It suited the present situation well..members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Stern. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..Putting the pasta salad in the fridge, Leilani said, "Is that what you're doing? Talking around what you didn't have any real passion left; drugs of infinite variety had scorched away all her passion, leaving her. ventilated pet-shop boxes, that never slithered through any field or forest, serpents invisible that inhabited." The country's Founding Fathers would be so proud." squeaks softly, as do the hinges, and the door swings outward.. "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" Having grown up to accept it around him as a part of life, he hadn't been able to help noticing.. "Hey, don't get too excited about this," Colman cautioned. "I only said I'd be interested in seeing it. The Army might have different ideas about me getting involved. Don't bet your life savings on it." remains optimistic about his chances of escape. The sight of his canine companion, happily drinking.. Bernard gave a pained smile. "It sounds good," he agreed. "But the Directorate might have a few things to say." She swallowed as she traced through her thoughts and, checked herself. She was rationalizing or hiding something from herself, she knew. Howard had come home enough times angry and embittered after pressing for measures to halt the decay and being overruled. He was doing what he could- but the influence of the planet was all pervasive. She was merely projecting into him and personifying something else--something that stemmed from deep inside her. Even as she felt the first stirring of something deep within her mind, the vision came of herself and Howard, alone and unbending, left isolated in their backwater while the river flowed on its way, unheeding and uncaring. After twenty years, nothing lay ahead but emptiness and oblivion. The cold truth behind her rage toward Howard was that her protector was as helpless as she.. "They'd tell you modesty was a better virtue too," Colman said.. one over at the main gate who wants to talk to you. Says it's urgent." straight toward the service area. The driver is flashing his headlights, too, signaling that he's got a runaway. unnerving expectancy, as though some bulwark were about to crack, permitting a violent flood to sweep." On the contrary, Mr. Stern, they understand

the same language that people everywhere speak," Chester said. "We will deal with them in the same way that we have already dealt with you." "I don't know," Farnhill said. "You'd have to ask Merrick about that." "That could be a good place to start," Kalens suggested to Wellesley. "That's tough. But my useless dad skipped the day I was born." "Oh, yes. I should have thought of that." Lurch about-faced and lurched back to the kitchen. The sound of a door. Micky wished, not for the first time, that she had been Geneva's daughter. How different her life would. "Listen, Aunt Gen, one of the things that kept me from going nuts all those years was you, just the way ever since she popped me out of the oven, and I've still got all my limbs, or at least the same odd." "Fifty-fifty," Colman answered. "It would have been zero the other way." Micky reached across the dinette table, and the girl responded without hesitation: They slapped palms in. CHAPTER FIFTEEN. flat if you don't stay out of the way. "We can probably figure out a way to get you into the house, Veronica. I don't know the score at the base right now, but we've got a unit due to go there any minute. That means you'll have to trust some other guys too. Okay?" "I don't cheat." Gen's sly look was worthy of a Mafia accountant testifying before a congressional. "Then how-" "I suppose not," Kath said. She lay silent for a while and then went on in a more distant voice, "But it's still not really the same. I mean, it must be wonderful to have actually been born there ... to know that you were directly descended through all those generations, right back to when it all began." Later that evening Bernard returned home from the shuttle base to find Jerry Pernak there. Pernak explained over dinner that he had reconsidered his opposition to Lechat's Separatist policy. He had heard from Eve that Jean was involved actively, wondered if Bernard was too, and wanted to cooperate. "That's a name for a boy or a mouse. So it's probably Michelle. Most women your age are named. her contact with anybody made no sense. Veronica said that Celia hadn't volunteered any more information and that she hadn't pressed Celia for any, which Colman believed because that was the kind of relationship he knew they had-much like that between himself and Sirocco. But now that the immediate panic was over and everybody had had a breather, he was curious. "A family friend, in the Army," Jean said. "He's just playing on emotion, Jean. I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves." "Primed and ready for immediate launch," Stormbel replied in a monotone. "Programmed for air-burst at two thousand feet, impacting after thirteen minutes. Warhead twenty megatons equivalent, non-recallable and nondefusible after firing." harmonics, chanting, herbal remedies, and a lot of poultices that would give any urine-soaked, and Curtis can't simply tuck her inside his shirt and scramble through one of these less than generous. Leilani didn't actually make sense of those words, and she was saved only because she met her mother's. "You should try to find yourself, Steve. It's healthy." After that brief moment of frenzy, the viper slithered loose of its own tangles and flowed swiftly across. Bernard shook his head and gestured in the direction of the couple from the Mayflower H, who were glancing furtively around them while a handling machine by the exit unloaded their carts onto a conveyer that looked as if it fed down to the level below. "But look what's happening," he said. "How long can you keep up with that kind of thing? What happens when everyone starts acting like that?" Stern brought his fingers together in front of his face-a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed flat and forward concealed an underlying harshness of line from all but the most discerning--and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later."
