Congreve's voice warmed to his theme, and his manner became more urgent and persuasive. "Developments in genetic engineering and embryology make it possible to store human genetic information in electronic form in the' ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship'~ computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would

establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected. 'natural, effortless result of any vital relationship. Ideas are what happen when people connect with each. Crawford looked at it briefly, then squatted down beside the rest, wondering what all the fuss was about. Everyone looked very solemn, almost scared. Nolan had shrugged, too, and dismissed her from his mind. But that night as he lay on his bed, listening to the pounding of the drums, he thought of her again and felt a stirring in his loins. From across the room Billy Belay tried to make a sign for Amos to be quiet, but the grey man turned around, and the finger Billy had put to his lips went quickly into his mouth as if he were picking his teeth. "I think I can answer that," McKULian said. "These organisms barely scrape by in the best of times. The ones that have made it waste nothing. It stands to reason that any really ancient deposits of crude oil would have been exhausted in only a few of these cycles. So it must be that what we're thinking of as crude oil must be something a little different. It has to be the remains of the last generation." She sat down and waited for Barry to be inspired.
